About me

Grew up in the country, prefer the city; studied writing words, prefer writing code. It's easy to put a box around an English Major. Why not study something "real," right? On top of that, I'm in sales, so I understand if you take me with a grain of salt, a shot of vinegar, or worse. However, I believe it to be self-evident that you can learn more from your failures than your successes. If my most epic failures are a year of Law School and Engineering, then I guess even an English major can do the math.
